1,000 lbs. capacity
(Side Extensions not shown)

Engineering Excellence

Forward's U.S. engineers have over 29 years of combined experience designing automotive lifts for service and repair shops. Forward's philosophy is to own our designs rather than use someone else's off the shelf product.

Product Integrity

21st century design tools allow us to create, control and validate our designs to ensure maximum performance. Forward lifts are thoroughly tested to meet quality and durability standards. All product families are proof load tested to 1½ times rated capacity and rigorously cycle tested.

FORWARD
LIFT

Models 1000MCL/J1000MCLDT

- Front wheel vise prevents wheel movement during securing, lifting and maintenance.
- Foot pedal controlled air valve operates on 100 psi air.
- Rear section (for the Droptail version) is removable for complete rear wheel access.
- Side extensions are standard for ATV and additional vehicle service.

The motorcycle lift comes with a wheel vise and two 12" extensions, making it great for motorcycles, ATVs, lawn mowers, golf carts, etc.
