FSA14

The FSA14 accommodates a large range of wheelbases with 23' long runways, oversized slip plates and adjustable radius gauge pockets.

PRODUCTIVITY and PERFORMANCE FEATURES

Longer rear slip plate with auto locking steer designed to accommodate a greater wheelbase range for two and four wheel alignments.

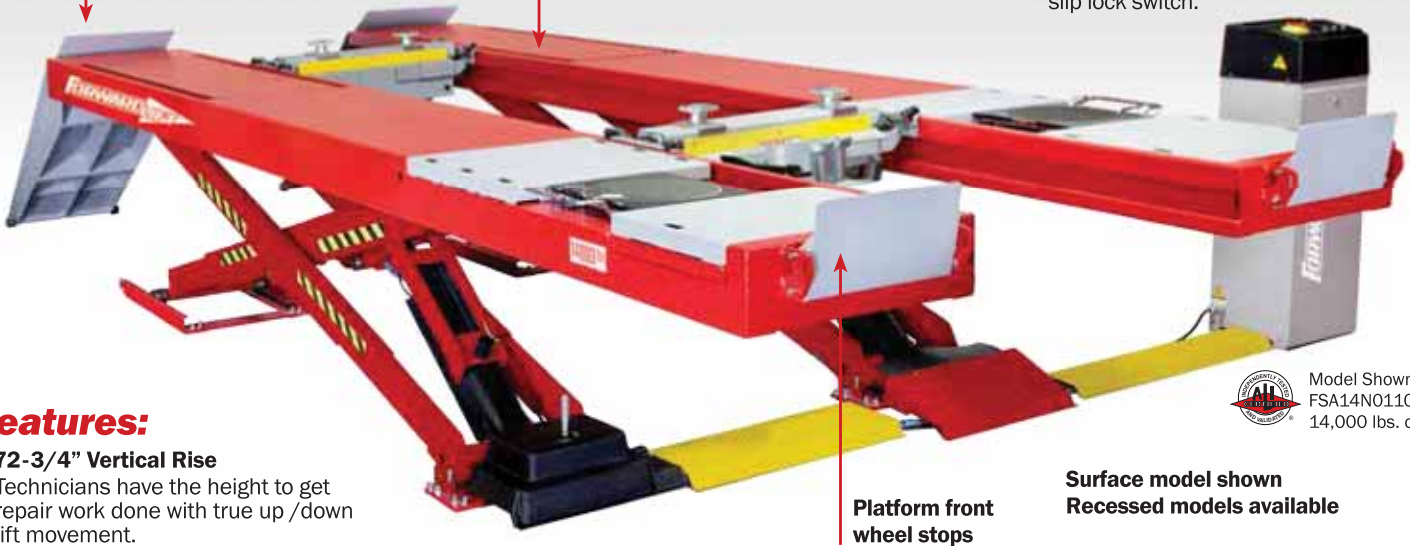

Alignment lifts come standard with two 7,000 lbs. capacity rolling jacks

Control Unit

Robust, simple buttons and switches for long life. Includes single point rear slip lock switch.

Automatic Rear Wheel Checks engage when the lift is raised and release when lowered.

Features:

- **72-3/4" Vertical Rise**
Technicians have the height to get repair work done with true up/down lift movement.
- **Open Front and Rear Design** creates space-saving working clearance through the entire middle of lift with open access points for easy movement - minimizes bay space.
- **Robust Hydraulic System**
Simple, reliable master / slave hydraulic system maintains level platforms during entire lifting cycle.
- **25-1/2" wide runways** for greater drive on area.
- All pivot points are made with **self-lubricating bushings** for long life.
- **Base plate leveling system** for easy installation.
- **ALI Gold Certified lift**

Lifts come standard with two (2) **turning radius gauges**. Easy to use adjustable spacers for radius gauges - the ultimate in wheelbase flexibility.

Mechanical locks with 14 locking positions, automatically engage and pneumatically release, ensuring maximum security when lift is in raised positions.

Auto Locking Rear Steer

Slip plates with convenient pneumatic locking at the controls. No need to manually lock/unlock plates increasing technician productivity.
