Spot-Rite™ 3-Stage FrontArms are designed to accommodate vehicles both symmetrically and asymmetrically. This feature allows the technician to position the vehicle doors in front of or behind the column to prevent door damage.

Spot-Rite™ 3-Stage FrontArms are available on the **I10**, **I12PRO** and **DP10A**.

All Forward Lift two-post lifts are engineered with full-height structural steel columns and crossbeams that ensure strength throughout the lift.

- Hydraulic cylinders are located in each column concealed within the carriage itself
- Features direct-pull lifting technology for high-efficiency, low-maintenance performance
